

MUHAMMAD MUSTAPHA

Aspiring Full-Stack Developer | Software Engineering Student

Abuja, Nigeria | +234 7032 579 906 | muhadmust5104@gmail.com |
[linkedin.com/in/muhammad-mustapha-b6aab3332/](https://www.linkedin.com/in/muhammad-mustapha-b6aab3332/)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering student based in Abuja, Nigeria, with a strong foundation in front-end web development and a passion for building practical, user-focused solutions. Experienced in designing and deploying personal projects using HTML, CSS, and JavaScript, and actively expanding expertise toward full-stack development. A fast learner who thrives in collaborative environments and is eager to contribute to a forward-thinking team through an internship or entry-level role.

EDUCATION

Bachelor of Science in Software Engineering Expected: 2030

Federal University of Technology Minna — Niger state, Nigeria

- Relevant coursework: Data Structures, Web Technologies, Object-Oriented Programming
- Member of the Association of Information and Communication Technology Student

TECHNICAL SKILLS

Front-End: HTML5, CSS3 (Flexbox, Grid, Responsive Design), JavaScript (ES6 basics), Version control/ GIT

Tools & Platforms: VS Code, Git, GitHub, Google Chrome DevTools

Productivity: Microsoft Word, Excel, PowerPoint

Soft Skills: Problem-solving, teamwork, written & verbal communication, self-directed learning

PROJECTS

Personal Portfolio Website

2025

A responsive personal website built from scratch to showcase skills, projects, and contact information.

- Designed and structured the layout using semantic HTML5 and CSS3, with mobile-first responsiveness
- Applied CSS Flexbox for clean, adaptive section alignment across screen sizes
- Deployed the site via GitHub Pages for public access

JavaScript Calculator App

2026

A fully functional browser-based calculator handling standard arithmetic operations.

- Implemented core logic (addition, subtraction, multiplication, division) using vanilla JavaScript
- Built an intuitive UI with CSS Grid for button layout and styled for clear usability
- Handled edge cases such as division by zero and chained operations

Solpal — AI Coding Mentor

May 2026

Dev3Pack Hackathon Project | github.com/Impromptu55/Solpal

Built the complete frontend for an AI-powered coding mentor application that helps beginner developers debug code and earn blockchain-verified achievement badges.

Key Contributions:

- Built responsive UI using Next.js 14, React, and Tailwind CSS
- Integrated Phantom wallet connection for Solana devnet transactions
- Implemented real on-chain badge minting using Solana memo transactions
- Connected frontend to FastAPI/Groq AI backend for code analysis
- Collaborated with a team using Git and GitHub for version control

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Solana Web3.js, Phantom Wallet, Groq AI (Llama 3.3 70B), FastAPI, Python

CERTIFICATIONS & ONLINE LEARNING

- 3MTT Foundation Course
- Introduction to Web Development – Coursera (2022)
- Udemy Javascript

ADDITIONAL INFORMATION

- Actively building personal projects and contributing to online coding challenges (e.g., Coursera, Udemy and Modern Javascript)
- Currently learning React.js to advance toward full-stack development
- Open to internships, graduate trainee programmes, and entry-level software development roles
- Available to start immediately upon completion of current academic semester

Collaboration

- Team collaboration via GitHub
- Working with a backend API built by a teammate
- Reading and integrating other people's code
